

TSB - CAS04

Models applicable > Case 275,354,374,384,414,424,434,444,2424,2444

Description > Models fitted with dual Auburn assembly
CLUTCH COVER REPLACEMENT
Ag Clutch Part Numbers > 228 2301 CA and 228 2301 CA

In the above models there are two different width facings used on the main clutch plate. The clutch cover assembly is mated to the equivalent width disc. These must be matched by sample to the part numbers below, and will not interchange as separate components.

228 2301 CA > use > 328 1012 CA-DCO

228 2302 CA > use > 328 1009 CA-DCO

Mismatching of these covers and plates may cause release problems and premature failure of the clutch.
