

TSB - F03

Models applicable > Ford / NH 5000 > 8000 series tractor

Details > with 300mm lever type cover assembly
 Ag Clutch Part Number > 130 0001 FO (cover)
 130 0001 FO-SH (shim)

CLUTCH COVER SHIM REPLACEMENT

Check clutch plate thickness prior to installation.

When replacing the above lever and spring cover assembly, the original shims must be reinstalled when using any aftermarket disc having a compressed thickness of 10.0mm

There are 4 shims measuring approximately 1.5mm in thickness fitted per cover. These are available for purchase if the old set has been removed due to disc wear.

Note >

In some cases the aftermarket discs can be 8.5mm thick - these do not require the use of shims.
