Details > with 330mm diaphragm type cover assembly
CLUTCH PLATE and COVER COMPATIBILITY
Ag Clutch Part Numbers >

133 0001 FO (AP)

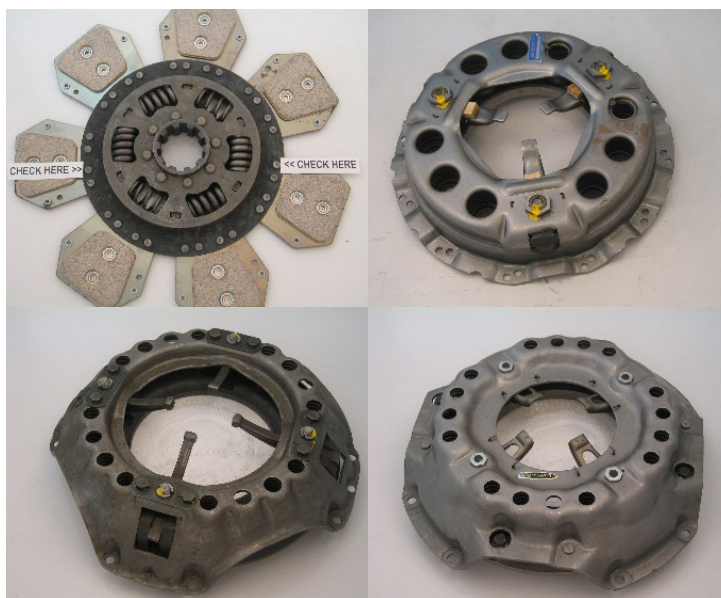

333 1004 FO-DCB

133 0002 FO (LuK)

The clutch disc shown above is designed with a heavy duty hub configuration and is only used in conjunction with the two covers listed.

WHEN USING WITH ALTERNATE COVERS BELOW >

Check the clearance of outer Marcel leaf rivet head of the disc inside cover base plate. This must be a minimum diameter of 186mm to avoid contact and allow full wear of the ceramic buttons.

Failure to check this may cause premature failure of the clutch disc.
