

TSB - JD00

Models applicable > John Deere 840 to 3140

Details > with 320mm Sachs or Luk diaphragm assembly
Ag Clutch Part Numbers > 133 2701 JD and 133 2301 JD

CLUTCH UPGRADE USING 330mm REPLACEMENT

As shown above, the cover mounting surface of the flywheel must be increased to accommodate the larger clutch.

The original diameter = 326.0mm must be machined out to the new diameter of 330.5mm

The flywheel depth must also be restored to 21.6mm (.850in) as per the original specification.

The cover locating studs must be re-fitted using Loctite or a similar retaining compound.
